With little more than some ink, paper, and your own fingers, you can become an artist! Caldecott recipient Ed Emberley, author of *Go Away, Big Green Monster!*, as well as many creative art books (Ed Emberley's *Great Thumbprint Drawing Book*, *Ed Emberley's Drawing Book: Make a World*, etc.), shows readers how to turn fingerprints into lions, basketball players, reindeer, "bean buddies," submarines, rainbow dragons, trees, even watermelon. Emberley provides straightforward information about materials and techniques on the very first page, then sets readers free to discover and explore. Step by step, Emberley takes artists through the process, showing, for each picture, a fingerprint first, then adding simple lines and other fingerprints to make the print evolve into an entirely new entity. A mouse, for example, starts out as a brown oval fingerprint. Next, two pink fingertip-print ears are added. A black dot makes a nose. Two smaller dots become the eyes, and finally a few lines turn this blob into a bewhiskered mouse head. Young artists can spend hours creating designs, patterns, and decorative scenes with this fun technique, especially if they move on to advanced finger-printing on the last page. (Ages 4 to 8) --Emilie Coulter

From Publishers Weekly

Ed Emberley adds to his popular drawing books series with his paper-over-board *Ed Emberley's Fingerprint Drawing Book*. An opening spread describes the necessary "ingredients" for using fingertips as paintbrushes (inkpads, poster paints, food coloring, etc.); in the following spreads, Emberley leads by example, adding one element at a time to show how to make a frog, for instance, or a bumblebee in "The Garden" or animals and birds in subsequent spreads. He also offers ideas for seasons, holidays and feelings. (Apr.)

Kindergarten-Grade 3-A step-by-step approach to drawing for beginners and those who are artistically challenged. Each figure introduced can be made with a basic fingerprint or more, and then lines and dots are placed beneath the form to take budding artists to a complete picture. It is so easy to do that even very young children can enjoy a simple art adventure. A brief introduction refers readers to various ink pads, paints, and markers. Emberley also suggests using vegetables or gum-rubber erasers in addition to or instead of fingers. By dipping a finger into an ink pad, a basic form is made from which animals, bean buddies, clowns, and objects can be portrayed. The author then moves readers into general scenarios such as "The Garden" and

"The Pond." He includes ways of showing emotions, holiday symbols, and a sketchbook full of supplemental ideas. The section devoted to advanced fingerprinting has slightly more difficult projects without step-by-step instructions. Emberley's books are especially valuable to nonartistic adults who want uncomplicated projects to do with children. This book is similar to Ed Emberley's *Great Thumbprint Drawing Book* (Little, Brown, 1977), but the addition of color fingerprints makes it visually more appealing.

easy to use

By ak

Amazon parents' reviews helped me choose this book, and I am glad I chose it. The major advantage is how easy it is to use. There are no words. You view a row of drawings in which you see the train developing; the first drawing has just the first two or three shapes of the train, and each followup drawing adds more shapes. There are no missing steps, and the train turns out looking like it's supposed to. I'm generally terrible at this kind of task and I found it easy. My son (almost 3, and train-crazy) and I sat down together to do this, and it held his interest for a relatively long period of time, I think in part because he understood how I was using the models in the book to make our sketch. The drawbacks are as follows. First, the drawings are relatively elaborate, with lots of tiny shapes to add. Though the task held my son's interest longer than I expected, it didn't hold his interest all the way through (though I have to say, I kept drawing and he kept looking back to see how I was doing, and he absolutely loved the finished product). The second drawback is that the trucks and trains in the book look relatively similar to each other. I have the feeling that I will memorize three or four and that will be the full use of the book. The third drawback is related to the main advantage of the book; this is a step by step recipe, and it isn't clear to me how I would go from copying to sitting down and drawing a train freehand, or to drawing something that is other than exactly what is shown in the book. But in all, I highly recommend this book. My son loves to draw and loves watching people draw, but this wasn't something we could do together because all I know how to draw is a simple house. I've taken art classes before and I just don't have that talent. If I get enough of these books, and can memorize a few trucks, animals, and faces, then this opens up a new activity for us.

Great Gift for Creative Kids

By L.

I gifted a set of these Ed Emberley drawing guides to my 5 year old cousin (along with a sketchbook and some drawing utensils). He is very fascinated with art and loves the drawing books -- now he wants them all!

I no longer have to scramble to think of what to gift him on holidays, the answer is always another Emberley. At least until I run out of the series or he inevitably grows out of coloring.

I learned to draw all kinds of things when I checked these books out of the library as a kid; so they hold nostalgic value to me. I was very happy to pass it on to my young cousin.

My childhood favorite is now my childrens' favorite!

By Tavia

Ed Emberley is just fantastic. I had only one or two of his books as a child (30-ish years ago) and once I found out there were more, I bought everyone I could find. My girls really enjoy them (now almost teens). The step by step approach to taking shapes they're familiar with and putting them together to make such cute drawings helps them to branch out into drawings of their own. We leave notes for each other and put something we learned to draw from EE's books on the note - brightens everyone's day!
