From the Publisher

Titles of related interest from Waveland Press: Endicott-Endicott, *The Headman Was a Woman: The Gender Egalitarian Batek of Malaysia* (ISBN 9781577665267); Netting, *Cultural Ecology, Second Edition* (ISBN 9780881332049); and Rappaport, *Pigs for the Ancestors: Ritual in the Ecology of a New Guinea People, Second Edition* (ISBN 9781577661016).

From the Back Cover

“I was highly impressed. I have read 6–8 books preparing for and seeking a text for my cultural ecology class and found little that was at once engaging, informative, and accessible. This is that book—concise, compelling, and straightforward.” — Susan Barclay, Seattle Central Community College

“This, in my view, is the best text for instructors to use in an introductory course in human ecology or ecological anthropology. Just 118 pages, it is easy to read, yet covers the history of the subject all the way from Julian Steward to the influence of Roy Rappaport and his pigs to, most important for the new century, current climate change, globalization, and spiritual ecology. Students will appreciate the price. This is one of those rare books that will influence students for the rest of their lives.” — Thomas N. Headland, Summer Institute of Linguistics

ENVIRONMENTAL ANTHROPOLOGY BY PATRICIA TOWNSEND PDF

Environmental anthropologists organize the realities of interdependent lands, plants, animals, and human beings; advocate for the neediest among them; and provide understandings that preserve what is needed for the survival of a diverse world. Can the things that anthropologists have learned in their studies of small-scale systems have any relevance for developing policies to address global problems? Townsend explores this dilemma in her captivating, concise exploration of environmental anthropology and its place among the discipline's subfields. Maintaining the structure and clarity of the previous edition, the second edition has been revised throughout to include new research, expanded discussions of climate change, and a chapter devoted to spiritual ecology. In the historical overview of the field, Townsend shows how ideas and approaches developed earlier are relevant to understanding how today's local populations adapt to their physical and biological environments. She next presents a closer look at global environmental issues--rapid expansion of the world economic system, disease and poverty, the loss of biodiversity and its implications for human health--to demonstrate the effects of interactions between local and global communities. As a capstone, she gives thoughtful consideration to how, as professionals and as individuals, we can move toward personal engagement with environmental problems.

Super fast shipping

By ralynn

Really needed this for class, got it in 2 days. Very well packaged, no creases, no bends, no nothing really. Just a perfect brand new book. Thanks!

Needs more detail

By me

If you have read the articles she discusses in this book, then it's a great supplement. But if you're buying this just to read or learn more about Enviro Anth, I would chose a different book. She often gives vague descriptions of the topic/article she's discussing to where you don't always understand her point or the situation. We used this as a supplement in a senior level anthropology course at LSU.
