The perfect Interacting number book for your little ones

By MrsButterfly2U

Danica McKellar has once again inspired young minds creatively to love numbers. It's the perfect book to engage young children that are just learning their numbers. This book allows the reader to point out different things on each page, discuss and count. I really enjoyed the illustrations and I think you will too! I bought this book for my in home Daycare for me to read during circle time. I think I would like to purchase each child one for their Birthdays to enjoy every night. The ending of the book has a wonderful letter from the author and a print of her signature too!

Amazing book with amazing teaching ideas.

By Jerry

I don't normally give reviews but I just had to on this one. This book is absolutely amazing. It shows many ways to learn numbers. I love how she puts suggestions in the book to help parents and or teachers to teach numbers in different ways. And ways to make it fun and turn it into a game. Amazing book period. Would definitely recommend to anyone with a toddler. My son loves it. And the plus side not only is it going to help teach him numbers we are also going to use it to teach him reading. If you are on the fence and think this is another one of those celebrity books, think again. This book was written by an amazing mathematician and mother who also happened to be a celebrity. I would say buy it you will not regret it and your child will thank you.

Received this adorable book yesterday and read to my little one that same night. He loved going over the many items on the page that coordinate with the page number. I think it's great to emphasize the importance of math at an early age and specifically how it's used in our everyday lives, this book does a great job at starting that process. So happy to add this precious book to his book collection, highly recommend it's a must have!
